# Animals including Humans

## Key Vocabulary

<b>Anus</b>	Where faeces leave the body
<b>Carbohydrate</b>	The sugars, starches, and dietary fibre that occur in certain foods.
<b>Carnivore</b>	An animal that feeds on other animals
<b>Digest</b>	Break down food so it can be used by the body.
<b>Energy</b>	Strength to be able to move and grow.
<b>Large intestine</b>	Where water is absorbed from remaining waste food. Faeces are formed here.
<b>Healthy</b>	In a good physical and mental condition
<b>Herbivore</b>	An animal that eats plants
<b>Nutrients</b>	Substances that living things need to stay alive and healthy.
<b>Oesophagus</b>	A muscular tube which moves food from the mouth to the stomach.
<b>Omnivore</b>	An animal that eats plants and animals
<b>Predator</b>	An animal that hunts and eats other animals
<b>Prey</b>	An animal that is hunted and eaten by another animal.
<b>Producer</b>	An organism that produces its own food.
<b>Protein</b>	Used to build and repair muscles and bones.
<b>Rectum</b>	Where the faeces are stored before leaving the bottom through the anus
<b>Saturated Fats</b>	Types of fats, considered to be less healthy, that should only be eaten in small amounts.
<b>Stomach</b>	An organ of the digestion system where food is broken down and churned around by acid.
<b>Small intestine</b>	Part of the intestine where nutrients are absorbed into the body.
<b>Teeth</b>	Hard structures in the mouth that help by biting and chewing food.
<b>Unsaturated Fats</b>	Fats that give you energy, vitamins and minerals.

## Aims of the unit

Children can name the different types of teeth found in humans; Children can explain the function of teeth; Children can explain what tooth decay is and how to look after our teeth; Children can describe the simple functions of the basic parts of the digestive system in humans; Children can construct and interpret a variety of food chains, identifying producers, predators and prey.

## Curriculum aims

Describe the simple functions of the basic parts of the digestive system in humans; Identify the different types of teeth in humans and their simple functions; Construct and interpret a variety of food chains, identifying producers, predators and prey.

### Human Teeth and Their Functions

Some people have wisdom teeth but they have no function now.

### To help prevent tooth decay:

- limit sugary food and drink;
- brush teeth at least twice daily using a fluoride toothpaste;
- spit toothpaste out (rather than rinsing) after brushing your teeth because rinsing can stop the fluoride in the toothpaste from working as well;
- visit your dentist regularly.

### The Digestive System
